

THE WEEKLY

REPORTERS

Ofsted's visit to Horton Park Primary School

17th MAY 2012

On the 27th and the 28th March 2012. Ofsted came to our school to inspect it. The main job they do is to go round schools and see how well the school is doing based on the learning behaviour and many more criteria. They came round classes to see what they were doing in their topics and jotted down any evidence of us being a good school.

We all hope we get a good report as a school itself we deserve it. Good luck Horton Park Primary School!!!!!!

Circus Skills

Before the holiday, all the school came in the hall and there was a circus guest and we watched him do skills. He did some skills that we was amazed by, one of the skills was he got on the unicycle. And did some skills what we was surprised by and the teachers was as well.

He blew up a balloon and all the staff got one as well but they couldn't blow it up.

Harden

On the 28th of March harden primary came on a visit to Horton park for schools linking network. First we read a book called something else and the moral of the story was that the children in Then we had a look at the characters from monsters Inc and made some weird monsters of our own. harden, and Horton park are different in their own way. Later we talked a bit about some of our monsters, we went to the MUGA and did some

which was very confusing and then we went into colours of groups which the colours were on our name tags. As we arrived to our destination witch was the bungalow, Mrs Bruster was there to do some art with us and we made a massive banner saying "HARDEN AND HORTON SCHOOLS LINKING NETWORK". Some more people were drawing hands and then again drawing them on to a to a material, then decorating them in beads, glitter, stickers, words that you can use to stick. Later when we finished we went to our class again class 4, to learn Arabic and made a poster of Arabic words and normal words and set them out to 11 to 11.0.

Chickens

Early this week Horton Park ordered some eggs. Inside there was baby chicks. The whole school were excited as they waited for the chicks to hatch. After returning to school we was astonished by the baby chick staring at us.

Cars Math in Motion

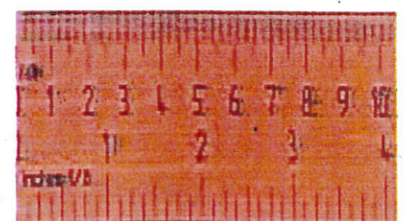

Cars maths in motion is a computer programme which makes maths fun. We have to measure a race track using a ruler and a protractor and also have to work out percentages. This week in cars math and motion the team are in the Bradford finals, we was checking today how much fuel we need and our pits stops, because our cars might blow up when we are racing in the Bradford final.

Life Cycle For Chicks:

For hens to produce they lay eggs. After a few weeks they begin to hatch. Soon after hatching they start walking round. Slowly they grow and grow until they become a chick. They then become a fully grown hen or rooster.

This week we came second in the league but we came fifth in the Bradford final. Next year we hope to win the league because year 4 has been trained by an ITC professional. He taught lots of good things in cars maths in motion.

Doncaster zoo

On the 28th and 29th March both years I went to Doncaster zoo. They had an amazing time. They had the opportunity to take spending money with a maximum of £1. With the spending money they bought a note pad and a

pencil. They saw meer-
cats and rhinos they said
they would like go again.

Enterprise

. In year six we have been doing enterprise with a teacher called Mrs Hussain. We wrote a letter to Mrs Hussain asking for leaders and deputy leader. We had to use persuasive words for example interactive, astonishing and many more. Cody, Hayder, Skie, Shannon and Callum all got jobs as team leaders and assistant.

Their people help us to make mood boards, values pyramids and much more. Dylan liked when we learnt about Hannah Cockcroft and his favourite was when we wrote letters to Hannah Cockcroft to persuade her to visit us. Shelby liked when we did about Bear Grylls and The best bit was when we did the assemblies
